

Amazon Clone

This project is a basic clone of Amazon's website, built with HTML and CSS. It replicates key components of Amazon's UI, including a header with navigation, a hero section, product categories, and a footer.

Table of Contents

Features

- **Header Navigation:** Includes Amazon's signature logo, delivery address section, search bar, language selector, account management, and cart.
- **Hero Section:** Displays a banner message with a prompt to visit Amazon India.
- **Product Categories:** Features different product categories such as electronics, fashion, beauty, etc., with placeholder images and titles.
- **Footer:** Includes links to company information, help sections, and terms of use.

Project Structure

The project is structured as follows:

```
Amazon Clone/  
|-- index.html  
|-- style.css  
|-- assets/  
    |-- images/ (Product and other images)
```

Technologies Used

- **HTML5:** For structuring the web page.
- **CSS3:** For styling the layout and components.
- **Font Awesome:** For icons in the navigation and footer.

Setup Instructions

1. Clone the repository:
 2. `git clone https://github.com/your-username/amazon-clone.git`
 3. Navigate to the project directory:
 4. `cd amazon-clone`
 5. Open `index.html` in your preferred browser.
-

File Breakdown

`index.html`

The main HTML file contains the structure of the Amazon clone, divided into:

- **Header:** Contains navigation elements such as the logo, search bar, language selector, and cart.
- **Hero Section:** Displays a banner with a link to Amazon India.
- **Shop Section:** Grid-based layout showcasing product categories with titles and placeholder images.
- **Footer:** Links to important company resources, help, and legal information.

`style.css`

The CSS file styles all components of the webpage:

- **Header Styling:** Flexbox layout for navigation items.
- **Hero Section:** Typography and spacing for the banner message.
- **Shop Section:** Grid layout for the product boxes.
- **Footer Styling:** Typography and spacing for the footer links and copyright message.

Screenshots

Screenshots are added in another file.

Acknowledgments

- **Font Awesome:** For providing icons used in the project.
